

Passion Shot:

Technical Specifications:

Camera: Unknown (shared via WhatsApp)

Resolution: 1 MP (960 × 1280)

File Type: JPEG (51 KB)

Lens / ISO / Shutter Speed: Not available

Description of the Shot:

The sky is alive with vibrant colours, deep reds, rich magentas, and soft greens blending together across the upper frame. Beneath them, a layer of glowing yellow clouds floats above the dark, jagged silhouettes of trees, creating a striking contrast. Faint stars twinkle in the background, adding depth and a feeling of endless space. The dark horizon and trees anchor the scene, drawing the eye upward to the dramatic, colourful sky.

Editing / Processing Notes:

- Colours are vivid, with magentas, greens, and yellows emphasized.
- Contrast between the sky and tree line is enhanced to make the clouds glow.
- The sky appears smooth and soft, likely from noise reduction.
- Brightness is slightly lifted to reveal more detail in clouds and stars.
- The effect suggests long exposure or subtle editing to bring out hidden colour bands in the sky.
